PROFILE

Senior Full-Stack Software Engineer with **5+ years** of experience delivering high-performance web and mobile applications. Adept in system architecture, backend optimization, and cross-functional collaboration. Proven track record of leading cloud-native solutions, building scalable microservices, and integrating AI workflows. Passionate about performance, automation, and developer experience.

SKILLS

ReactJs | NextJs | React Native | Golang | TypeScript | JavaScript | Redis | Kafka | ElasticSearch | PostgreSQL | MySQL | OracleDB | MongoDB | NodeJs | ExpressJs | C | C# | Java | Python | Docker | AWS | HTML | CSS | Grafana | Coolify | Prometheus | Loki | Sentry | REST | GraphQL | WebSocket | Firebase | Supabase | gRPC | Jest | Google Analytics | Clarity | Posthog | Git | GORM | Mongoose | Prisma

PROFESSIONAL EXPERIENCE

2025 – Present	Lead Algorithm Engineer <i>Six Atomic</i> Key Achievements • Took autonomous ownership of Garment Generation API (one of three core pillars), transitioning from full-stack web to math-heavy fashion domain. Within 3 months after just joining the team, architected a generative design platform with end-to-end agentic composition generating production-ready patterns in 5 minutes vs. 2-4 weeks traditionally. • Rapid execution with AI-native engineering: Designed comprehensive TDD test suites, orchestrated coding agents through design patterns (SOLID), and shipped solutions autonomously. Works without constant direction: architects problems, defines test contracts for agents, maintains quality despite velocity demands. • Leading agentic platform evolution as harness engineer: Designing agent behavior validation frameworks with quality thresholds. Architecting CI/CD pipelines and deployment strategies for coordinating multiple intelligent agents: managing operational complexity at scale and preventing agent drift. • Mentored 2 engineers on AI-assisted development, harness engineering, and agent orchestration best practices. Tech Stack: Python, TypeScript, AWS, Docker Engineering Practices: Agentic Frameworks, Semantic AI, Vector Databases, TDD, Design Patterns
2024 – 2025 Bangkok (Remote - Based in Canada)	Senior Full Stack Engineer <i>Empire Pixel</i> Key Achievements • Architected a RAG-powered content automation platform that increased AI-driven output by 700% and reduced costs from \$1,000 to \$5 per 100 posts—integrating multi-LLM orchestration (StormGPT, ChatGPT, Gemini) with vector search and intelligent content retrieval for scalable, context-aware generation.

- **Built a cross-platform mobile solution** with **web-to-native bridge** and unified payment processing (Android/iOS), while scaling infrastructure to support 800+ dynamic pages on a single VPS.
- **Designed observability-first infrastructure** (Grafana, Prometheus, Loki, Docker) across distributed services—enabling reliable, debuggable systems that improved Core Web Vitals and SEO performance.
- Led **technical direction** through architectural planning, code reviews, and mentorship—establishing clean code standards and cross-platform development best practices.

Tech Stack: React, React Native, Next.js, TypeScript, Node.js, PayloadCMS, Redis, Docker, AWS/GCP, Grafana, Payment APIs

2021 – 2024
Yangon, Myanmar

Mid Level Fullstack Software Engineer
BigBee

Key Responsibilities & Achievements

- Led performance optimization efforts, boosting app speed with SSR, hydration, caching, and rendering strategies using Next.js and React.
- Researched and integrated modern tech to enhance system architecture and align with evolving stack requirements.
- Built reusable, headless components for scalable and maintainable frontend architecture.
- Strengthened backend workflows by implementing Golang middlewares, pipelines, and context handling.
- Use of design patterns, OOP, and clean code principles
- Complex state management with RxJS
- Data pipeline or caching design with Redis

Tech Stack: ReactJS, Next.js, React Native, TypeScript, RxJS, React Query, React Hook Form, TanStack Table, Expo, Golang, PostgreSQL, Redis, Hasura, Docker

EDUCATION

12/2023 – 02/2025
Greenwich, United Kingdom

Bachelor Degree with Honors in Computing
University of Greenwich

12/2017 – 05/2020
Mandalay, Myanmar

Diploma in Electronic Communication and Engineering
Myanmar Institute of Information Technology

LANGUAGES

English
IELTS band score 7.5

Burmese
